*This is the second house we've built with McLachlan. Both experiences were excellent and very different houses*

We moved into our McLachlan built home last year. Waited a while before posting to ensure there were no warranty type issues (all good). This is the second house we've built with McLachlan. Both experiences were excellent and very different houses with a our last one being a low set acreage home in Samford and our current one a traditional queenslander/hamptonesque style home in the inner city.

We'd previously built with a volume builder and the difference was chalk and cheese. Nothing was too much hassle for McLachlan and whilst the variation prices were exxy, to be fair the house was built through covid and they never once came knocking to increase the contract sum other than variations which I requested. High quality finishes and trades really made a huge difference.

Shout out to Nick our site supervisor who was just exceptional in his approach to any issues and attention to detail in ensuring we got an amazing home at the end of it. If I was going to build again, I would definitely get Brad and co to build it again and happy to recommend McLachlan Homes.

Keep up dated on all the latest McLachlan Homes news.
